

Katarina Grantham

Full Stack Developer

Location: Barcelona – Phone: +34 655 975 217 – Email: katarinag1001@gmail.com – Web: katarinagrantham.com

SKILLS

- Key programming languages: MERN tech stack - **MongoDB, Express.js, React (React Native), Node.js**
 - Experienced in: **Postmon, Github, Javascript, Typescript**
 - Other technical skills: **SQL, Power BI, PowerQuery, Tableau**
-

KEY PROJECTS

[Wearable](#), Web App Wardrobe Organiser

- **Tech:** Full-stack web app with a **React frontend** and **Express/Node.js backend**, implementing **RESTful APIs**, protected routes, **user authentication**, and a scalable database-driven architecture.
- **Functionality:** Wardrobe management and outfit recommendation platform that helps users organise their clothing and discover outfit combinations. I developed a recommendation algorithm that suggests matching outfits from a user's wardrobe, alongside a weather-based outfit selection system that uses a weather API and wear-history data to recommend suitable daily outfits while maximising wardrobe variety.

TravlrMe, Mobile App Travel Organiser for [iOS](#) and [Android](#)

- **Tech:** Front-end modular mobile app using **React Native, Expo, JavaScript**, with **AsyncStorage** and **UUID**
 - **Functionality:** I built a travel planning application that allows users to organise trips, manage itineraries, track transport and accommodation bookings, create packing lists, and monitor travel budgets. The app automatically updates schedules and expenses when new bookings are added, reducing manual data entry and helping users keep all trip information in one place.
-

KEY EXPERIENCE

Data Analyst - *Kreatives Unternehmertum, Remote*

JAN 2026 - CURRENT (Contract)

- I rebuilt the company's **data infrastructure** to ensure information from different sources could be accurately connected, tracked, and reported.
- I **automated** the consolidation and reporting of data from multiple sources using **Power Query** and **M Code**, creating dashboards that gave the business clear visibility of project costs, cash flow, and performance while reducing manual reporting effort.

Data Analyst → Test & Targeting Analyst - *H&M, Barcelona*

SEP 2024 - AUG 2025

- I used **Python and SQL** to design, analyse, and evaluate customer and marketing **experiments** across CRM, web, and paid channels, providing statistically robust insights that informed optimisation and commercial decisions.
- I queried and analysed large-scale customer and CRM datasets using **SQL, SAS, and Power BI** across five markets, identifying trends in customer behaviour, retention, and campaign performance to support data-driven strategy.
- I acted as a **link between technical and non-technical teams**, translating business questions into analysis and presenting results in an easy-to-understand format, bringing the analysis to life for real business needs.

CRM Specialist - *Shuttlerock*

JAN 2023 - DEC 2023

- I managed and improved the company's **HubSpot CRM** infrastructure by building **automations, workflows**, and system integrations, while supporting the implementation of the **AI-powered sales tools Gong & Apollo** to improve process efficiency and data quality.
 - I used **SQL and Snowflake** to extract and analyse sales data, developing **dashboards** and reports in **Tableau** and working closely with stakeholders to provide clear insights into sales performance and business metrics.
-

EDUCATION

Barcelona Code School - *Full Stack Bootcamp*

AUG 2025 - OCT 2025

University of Exeter, Exeter - *Russian with French*

SEP 2013 - AUG 2017
